

LITEHOUSE CUSTOM PRINTING, INC.
LCPmugs.com

LCP is an Industry Leader in Product Safety Testing

PROP 65

Years ago we formulated our inks and ceramic mug glazes in accordance with the guidelines put forth in the Boelter Settlement concerning California Proposition 65. Though this was costly and time consuming it allowed our clients to ship promotional products into California without fear of legal consequences. Imagine the peace of mind that this brings you and your clients. Because LCP only sells drinkware with lead and cadmium levels well below the safe harbor limits our products do not require warning stickers of any kind. Couple this with our wide product line, drinkware innovations and truly award-winning customer service and you have a supplier that gives you that most precious commodity: time. No need to check on your order, no need to worry about product safety. Just go on about your life comfortable in the knowledge that we will take care of you.

Our newest bottle the ClearVue™ is now available with full color process and tight registration artwork. The patented flip-open lid and foldable handle are new and unique. The contemporary shape is stylish and understated, not distracting from your client's message. The ClearVue™ polycarb water bottle is 700ml and available in all the colors shown.

The LCP Logo Lid™ is the latest success story in our quest for creative products. This custom lid, in both stainless steel and all plastic, fits on three different travel mugs. Your logo is raised and used as the thumb-slider to open and close the lid. On our first order; 5,000 pieces, the customer had no printing on the tumbler just their raised logo on the lid for a sleek retail look to promote their company. Contact LCP for minimums, lead times, and our special ability to handle catalog programs. (LogoLid™ shown here with Yukon Tumbler)

LCP LogoLid™
Patent Pending

Product Safety Testing

In 2008 Litehouse Custom Printing is batch testing all product shipments as they come into our warehouse. We do not feel it is enough to have tested the product at one point sometime in the past. We are conducting on-going tests of every shipment of goods that come into our facility. This continual testing allows you peace of mind knowing that you are providing your clients only the safest drinkware available LCP has been and continues to be at the forefront of product testing and safety in promotional products.

We are dedicated to providing safe, effective promotional drinkware.
